

HACKATHON (DAY 1 & 2)

PLANNING THE TECHNICAL FOUNDATION

The Technical Foundation Of Quick-Commerce.

Why Q-commerce?

Q-commerce, or "quick commerce," refers to a rapidly growing sector of e-commerce focused on providing ultra-fast delivery of goods, often within an hour or less. It has gained popularity for several reasons:

- 1- Technological Advancements
- 2- Urbanization
- 3- Competitive Advantage
- 4- Consumer Convenience

Business Goals?

For a food website or quick commerce (q-commerce) platform, business goals typically focus on growth, customer satisfaction, and operational efficiency. One key objective is to increase customer acquisition and retention, aiming to expand the customer base while ensuring repeat purchases through targeted marketing and personalized experiences. A vital goal in q-commerce is to improve delivery speed and efficiency, ensuring on-time delivery within an hour to meet customer expectations. Additionally, expanding the product assortment is crucial, offering a wide range of food items, including fresh groceries and prepared meals, to cater to various consumer needs.

Target Audience?

1. Busy professionals. (The busy peoples because they have no time to cook.
2. Urban dwellers.
3. Young Adults and Students. (The students because they are busy in their studies)
4. Big Families.
5. Late-Night Peoples.

Frontend Requirements?

1. Responsive Design Intuitive User Interface (UI)
2. Quick and Easy Search Functionality
3. Real-Time Order Tracking
4. High-Quality Product Images
5. User-Friendly Checkout Process
6. User Reviews and Ratings
7. Payment Gateway Integration etc.....

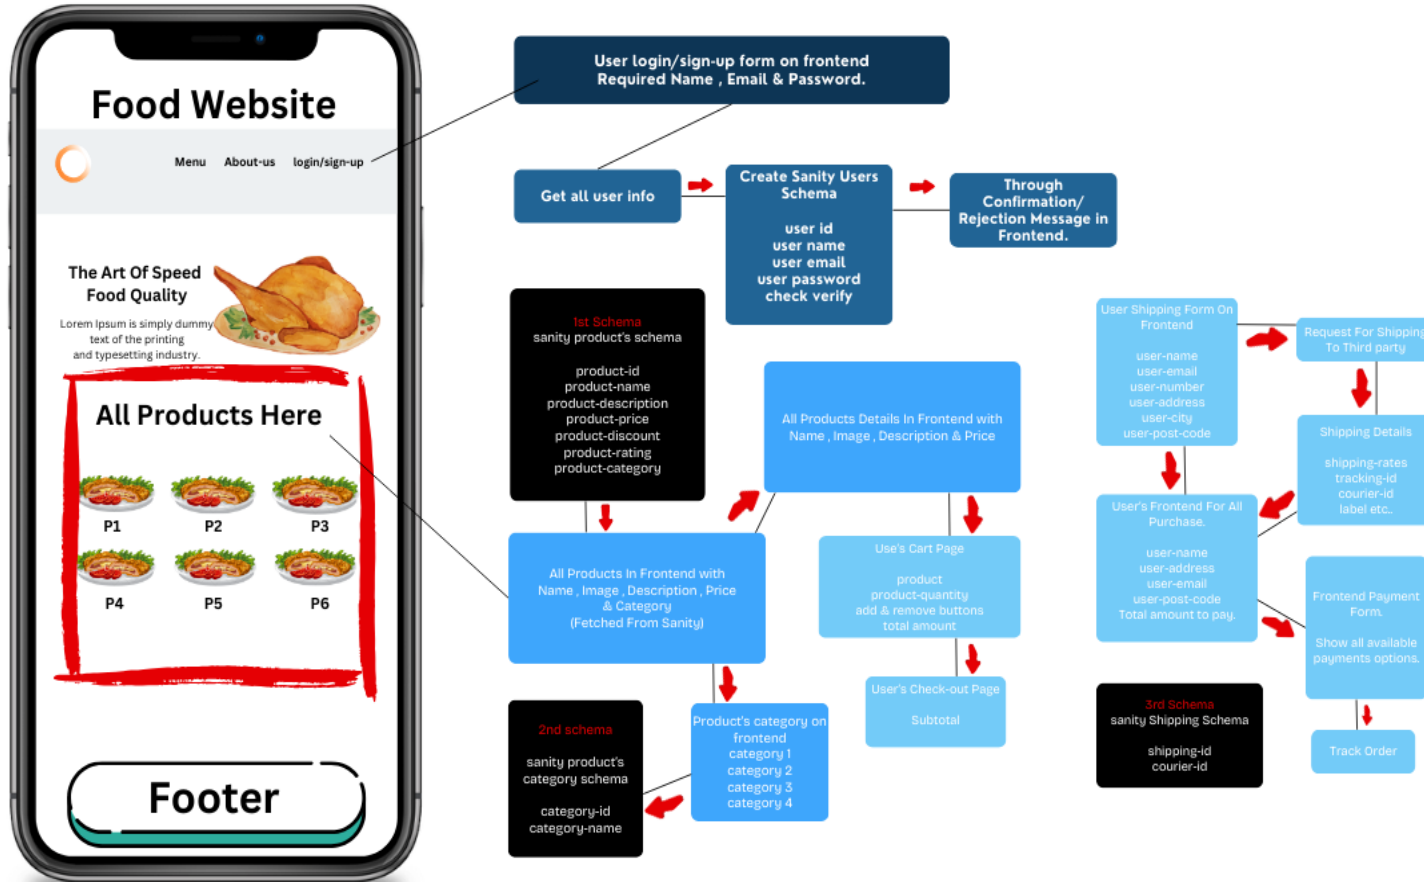

Components & their roles?

- 1- Next.js (For Frontend)
- 2- Sanity CMS (For Backend)
- 3- Product data API.
- 4- Third party APIs.
- 5- Secure payment gateway.

CONCLUSION

Aim is to make fully functional & Responsive website for user in which users see , select and order food for him/her in very friendly way , apply best practices for implement a security to avoid attacks make website fully secure. By using Nextjs for Frontend and Sanity CMS (Content Management System) for Backend & third API for shipping make a fully functional website.

A woman with blonde hair is shown from the chest up, looking down at a laptop keyboard. She is wearing a light blue denim shirt. The setting is outdoors, with a wooden lattice fence and green plants in the background. A glass of iced coffee with a black straw is on the table next to the laptop. The word "THANKYOU!" is superimposed in a large, bold, black, stylized font across the center of the image.

THANKYOU!
